

McCrometer CONNECT Hand Held Sensor Meter

OVERVIEW

McCrometer CONNECT/Automata's Hand Held Sensor Meter allows the user to read soil moisture, soil temperature, water level, etc. at the sensor's location. Pre-installed sensors connect easily to the spring terminals on the front of the meter. Press the power button on the side and see the readings displayed within seconds. The meter includes 1 analog channel, 8 AA batteries and is housed in a convenient labeled chassis. This meter **does not** have logger capability. For logger capability see McCrometer CONNECT/Automata's MINI-Wire with the Logger option Field Station. Sensors sold separately.

Optional: Capacity to read other types of sensors.
(At an Additional Cost)

SPECIFICATIONS

Power Supply: Internal battery pack, 8AA (included)

Inputs:

Soil moisture: 0-1mA

Soil Temperature: 1 μ A/Deg K

Recommended Sensor: Model AQUA-TEL TDR + T (0-1mA)

Weight: 1 lb.

Options: Rechargeable Battery Pack, Universal Charger, 4-20mA, 0-5V Inputs
